Mosquito Nix automatic system was installed on both playgrounds to help control the mosquito population. The organic compound is sprayed 3 times a day when the children are not on the playground and is safe for children and pets after 45 seconds dispersed into the air.

Please continue to send bug spray with your child as this system was installed to "help" but can not 100% take care of them.

For more information regarding the product please see www.mosquitonix.com.

Please say Avalon Academy referred you if you choose to have this installed at home. Avalon will get a \$250 credit for each referral.
